IDENTIFIERS *Acid Rain; Library of Congress

ABSTRACT

The term "acid rain," also called "acid precipitation," generally refers to any precipitation having a pH value of less than 5.6. This guide to the literature on acid rain in the collections of the Library of Congress is not necessarily intended to be a comprehensive bibliography. It is designed to provide the reader with a set of resources that can be used to focus on the topic. The document lists the subject headings used by the Library of Congress in cataloging information on acid rain. It also contains citations on acid rain materials categorized as: (1) brief introductions; (2) basic texts; (3) additional titles; (4) handbooks and encyclopedias; (5) other bibliographies; (6) conference proceedings; (7) government publications; (8) abstracting and indexing services; (9) journal articles; (10) technical reports; and (11) additional sources of information. ACID RAIN

Compiled by Pauline Hollmann

TB 86-11 December 1986

SCOPE: The term "acid rain," also called acid deposition or acid precipitation, generally refers to any precipitation (rain, snow, sleet, hail, frost, dew, or dry particles) having a pH of less than 5.6. The pH scale is logarithmic with a tenfold difference between adjacent numbers, i.e., water at pH 4 is ten times more acidic than water at pH 5, and 100 times more acidic than water at pH 6.

This guide to the literature of acid rain in the collections of the Library of Congress updates and supersedes TB 80-13, compiled by Alexander Hromockyj. Not intended to be a comprehensive bibliography, this compilation is designed--as the name of the series implies--to put the reader "on target."

BRIEF INTRODUCTIONS

LaBastille, Anne. Acid rain--how great a menace? National geographic, v. 160, Nov. 1981: 652-680. G1.N27

Thompson, Roger. Acid rain: Canada's push for U.S. action. Editorial research reports, v. 1, no. 9, Mar. 7, 1986: 167-184. H35.E35

SUBJECT HEADINGS used by the Library of Congress, under which materials on acid rain can be located in most card, book and online catalogs, include the following:

ACID DEPOSITION (Highly relevant)
ACID RAIN (Highly relevant)
ACID POLLUTION OF RIVERS, LAKES, etc. (Highly relevant)
ACID PRECIPITATION (METEOROLOGY) (Highly relevant)
AIR--POLLUTION (Relevant)
COAL--COMBUSTION--ENVIRONMENTAL ASPECTS (Relevant)
COAL-FIRED POWER PLANTS--ENVIRONMENTAL ASPECTS (Relevant)
SULPHUR DIOXIDE--ENVIRONMENTAL ASPECTS (Relevant)
